

**Tranche 1**  
**Argyll and Bute**

Agreed commitment - £309,507.67

	Organisation	Project name	LA org based	Islands for delivery	Requested amount	Project description
1	The Isle of Gigha Heritage Trust	Gigha's Active Travel Hub	Argyll and Bute	Gigha	£75,600.00	Purchase 6 e-bikes and 4 adaptive e-bikes to be available for hire from Gigha's Activity Centre, where an e-charger powered by solar PV panels will be installed. The project supports the Trust's drive to reduce carbon emissions on the island and to protect the natural environment.
2	Islay Development Initiative	From Small Seeds - Cornabus Tree Nursery	Argyll and Bute	Islay	£86,000.00	Install polytunnel, portacabin, water supply and other equipment and infrastructure for the tree nursery to generate income and deliver forestry management training to manage Islay's forest assets.
3	North West Mull Community Woodland Company	Ulva Housing Refurbishment Project	Argyll and Bute	Ulva	£72,859.04	Install double-glazing for 6 properties which are currently being refurbished to a habitable and sustainable standard. This will encourage the 6 remaining resident of Ulva to remain on the island and will offer low-cost sustainable housing to 10 more residents.
4	Islay & Jura Community Enterprises Limited	Islay leisure's resilience and sustainability	Argyll and Bute	Islay & Jura	£75,048.63	Upgrade waste heat recovery exchanger shared from Bowmore Distillery, install energy management and saving equipment and business efficiency measures to increase operational efficiencies & security. Project will reduce energy costs/Co2 emissions and support post Covid recovery to develop long term economic sustainability.

**Na h-Eileanan Siar**

Agreed commitment - £475,853.32

	Organisation	Project name	LA org based	Islands for delivery	Requested amount	Project description
5	Clan Macquarrie Community Centre	The Hebridean Community Garden	Na h-Eileanan Siar	Lewis	£48,361.40	Expand the community garden with new polycrubs, improved irrigation system, raised beds, walling and picnic tables. Improve car park access, install electric car charging points and create a new website. The project will improve

						mental health opportunities on Lewis, and help reduce social isolation.
6	Leverhulme Community Hub	Leverhulme Community Hub -Towards Net Zero Carbon	Na h-Eileanan Siar	Harris	£36,330.00	Install 60 x 300w Solar PV panels, inverter and associated metering solar panels on the east and west sides of Leverhulme Community Hub as part of a long term plan to decarbonise the building.
7	Point and Sandwick Coastal Community Path SCIO	Shuilishader to Flesherin link track and Path	Na h-Eileanan Siar	Lewis	£80,920.00	Fourth phase of a coastal path linking the crofting townships of Shuilishader and Flesherin with an accessible path that will improve access around the peninsula and enable walkers to use, enjoy and understand the natural environment, flora, fauna of the area and surrounding marine margins.
8	Garadh a Bhagh a Tuath (SCIO)	Rays of Hope	Na h-Eileanan Siar	Barra and Vatersay	£14,520.00	Install solar PV panels to provide power for electric vehicle chargers. This funding is last brick investment into a community hub which will create a cafe, community space, events space.
9	Keose Glebe Estate	The 80/90/100 Project.	Na h-Eileanan Siar	Lewis	£80,000.00	Acquired with assistance from the Scottish Land Fund (95% of which is currently inaccessible) this community-led project is supported by crofters and residents. It will provide site access and infrastructure linked to the vision of building more housing, community facilities and creating spaces to support employment and business growth. In addition to housing, storage and workshops, future plans include forestry, peatland restoration, sustainable tourism, polycrubs and renewable energy.
10	MacLeans Bakery (Benbecula) Ltd	Bakery Green Transport	Na h-Eileanan Siar	Benbecula (Delivery to Barra, South Uist, North Uist, Grimsay, Berneray, Eriskay, Harris & Lewis)	£110,000.00	The purchase of two commercial fully electric refrigerated panel vans for delivery of bakery goods across the Uists, Barra, Harris and Lewis. In addition to removing the company's reliance on fossil fuels, the vans are cheaper to run than standard fuel vans and will deliver cost benefits to the business.

11	North Uist Distillery	Nunton Steadings' Journey Towards Carbon-Neutral Status	Na h-Eileanan Siar	Benbecula and North Uist  (Delivery to South Uist, Berneray, Eriskay and Grimsay)	£49,310.17	Purchase of an electric delivery van, and installation of an air source heat pump and underfloor heating as part of North Uist Distillery ongoing renovation of Nunton Steadings to achieve carbon-neutral business operation within the distillery and retail outlet.
12	Comunn Eachdraidh Nis (Ness Historical Society)	A' gluasad gu suidheachadh neodrach a thaobh carboin (Aiming for Carbon Neutrality)	Na h-Eileanan Siar	Lewis	£56,411.75	To install an air source heat pump, underfloor heating, double-glazed windows and loft insulation in the heritage centre cafe and community meeting space. This supports the journey to net zero, replacing dated electric heaters at the Ness Heritage Centre, which plays a pivotal role in local tourism and the broad sustainable economic benefits associated with this.

### Highland

Agreed commitment - £230,569.55

	Organisation	Project name	LA org based	Islands for delivery	Requested amount	Project description
13	Eigg Trading Limited	An Laimhrig Community Hub	Highland	Eigg	£149,785.00	The existing community building will be refurbished, creating a bigger and more flexible café/bar, craft shop, toilets, visitor interpretation, new children's facilities, office and meeting spaces. An adjacent repurposed agricultural shed will include a coastguard centre and three units for business/community rent. Eigg's renewable electricity generation and storage will be increased.
14	Isle of Canna Community Development Trust	Canna Decarbonisation - Phase 1	Highland	Canna	£80,784.55	Installation of individual energy monitoring equipment on all the island's supplies and a smart energy control system which can utilise this data to help match generation with demand. This will improve the financial viability of the community-owned electricity supply company, while addressing resilience at an island level.

## North Ayrshire

Agreed commitment - £130,000

	Organisation	Project name	LA org based	Islands for delivery	Requested amount	Project description
15	Community of Arran Seabed Trust - COAST	Our Own Boat	North Ayrshire	Arran	£63,000	Purchase of a coded boat to enable marine research to take place off Arran's coast to enable COAST to improve the level of research possible on Arran and enable education and training opportunities for young people.
16	Millport Town Hall	The Green Economic Recovery of Cumbrae	North Ayrshire	Cumbrae	£67,000	The regeneration of Millport Town Hall will transform a derelict building into community run hub. It will include a main and secondary hall, a commercial kitchen to cater for concerts, conferences and weddings, and self-catering flats to generate income. New jobs in catering, community liaison, administration, community arts, cleaning and maintenance will be created. The grant will be used to install green technologies and energy saving measures within the redevelopment

## Orkney

Agreed commitment - £445,224.05

	Organisation	Project name	LA org based	Islands for delivery	Requested amount	Project description
17	Island of Hoy Development Trust	YM Hall Regeneration	Orkney	Hoy	£99,436.68	Island of Hoy Development Trust plan to renovate their YM Community Hall kitchen to an industry standard. The Pay What You Think scheme kitchen offers training for young people and employment opportunities for working age islanders. The project includes purchase of IT, media and gaming equipment to create a digital hub for the island and building in some net-zero tech to support the development and overall aims.
18	Eday Community Enterprises Ltd	Eday Shop Community Hub	Orkney	Eday	£147,234.00	Creation of a community hub around community owned and managed Eday Shop to include an accessible, multi-purpose community space, upgrading of foodstore, and outdoor community green space. The project will improve

						energy efficiency, community connectedness and wellbeing.
19	The North Ronaldsay Trust	The North Ronaldsay Meat Larder	Orkney	North Ronaldsay  Shetland (mainland) where abattoir is located	£102,831.41	Create a meat larder on North Ronaldsay to allow the community to have control of the processing of the rare native breed of North Ronaldsay sheep and build up a North Ronaldsay sheep meat selling business. The refrigerated unit will include battery storage to be powered by a wind turbine. This project will utilise an abattoir on Shetland.
20	Sanday Community Shop	Cycle Sanday	Orkney	Sanday	£7,477.48	Encourage a cycle culture on Sanday by building a new bike shed for manual and electric bikes to be hired out to locals and tourists and offer a repair, re-use and recycle service.
21	Upper Stove Gardening	Upper Stove Market Garden extension	Orkney	Orkney (Mainland)	£6,201.48	Expansion of small farm operation with a polytunnel to extend growing season/product, windbreak fencing to protect poly tunnel and tool/packing shed for veg box packing and storing. Increasing veg grown and sold locally will reduce food miles.
22	G Ballantyne	Grass harrows	Orkney	Orkney (Mainland)	£6,000.00	Purchase grass harrows to enable the growing of sustainable feed for cattle and for sale to the island equestrian market. This reduces the need to import feed over the winter. The grass harrows will be loaned to other farmers in the area thus increasing the benefit.
23	Hilary Grant Knitwear & Textiles	Orkney Knit Factory	Orkney	Orkney (Mainland)	£76,043.00	Strong proposal from a stable organisation. The project will support growth, employment and the circular economy by securing a knitting machine to produce garments in Orkney rather than having them manufactured in the Scottish borders, as is currently the case. This also offsets growing concerns that the supplier is scaling down which could jeopardise knitwear production and sales in the longer term.

## Shetland

Agreed commitment - £399,308.74

	Organisation	Project name	LA org based	Islands for delivery	Requested amount	Project description
24	Lerwick Boating Club	Renewable Energy Project	Shetland	Shetland (Mainland)	£20,842.00	Installation of an air source heating system to replace the current oil fired central heating system, insulation to increase the efficiency of the system, and a new combi-boiler for hot water.
25	Shetland Seafood Auctions Ltd	Electric transport	Shetland	East Burra, West Burra, Trondra, Muckle Roe	£75,328.00	Purchase 3 Electric vehicles to replace the current diesel fleet that transports staff and equipment between the company's two fish markets.
26	Kergord Hatchery Bookshop	Bookshop net zero	Shetland	Shetland (Mainland)	£39,810.11	Installation of a wind turbine and a charging point for electric vehicles at the bookshop in Weisdale.
27	Ocean Kinetics Ltd	Vessel Energy Storage Solution	Shetland	Shetland (Mainland) Across all Shetland islands	£91,197.75	Refit of one workboat in the Ocean Kinetics fleet with a battery hybrid system powering all onboard equipment while the vessel is working onsite (crane, capstans, winches etc). Project seen as a pilot/proof of concept for all workboats in Shetland.
28	Foula Wool	The Foula Wool Spinning Mill	Shetland	Foula	£98,200.71	Install a range of spinning mill machines to allow full processing of fleece into yarn on Foula (fleece is currently processed in England). The project would eliminate shipping overheads and secure two FT jobs. The mill would be operated using electricity from Foula's off grid renewable network.
29	Scalloway Meat Company Limited	SMC - First Steps to Net Zero	Shetland	Shetland (Mainland) Across all Shetland islands	£73,930.17	Installation of PV Solar with a total installed capacity of 23.8kw and install electric vehicle charging points. Replacement of existing diesel delivery vehicle with an electric van. Introduction of reusable container refill facilities in existing retail store.

**Tranche 2**  
**Argyll and Bute**

Agreed commitment - £224,873.00

	Organisation	Project name	LA org based	Islands for delivery	Requested amount	Project description
1	Mull & Iona Community Trust	Zero Emissions Community Transport for the Islands	Argyll and Bute	Mull and Ulva	£77,550.00	A new electric minibus will support sustainability and increase the capacity of the community transport service in the north of the Isle of Mull. This services residents of Mull and of the Isle of Ulva.
2	Tiree Community Development Trust	Tiree Electric Transport	Argyll and Bute	Tiree	£147,323.00	To install and new electric charge point as part of a wider development of the filling station on the island and purchase a new electric community bus that will benefit the care home, youth projects and rangers nature tours.

**Na h-Eileanan Siar**

Agreed commitment - £162,448.00

	Organisation	Project name	LA org based	Islands for delivery	Requested amount	Project description
3	West Harris Trust	Seilebost School Refurbishment – Phase II	Na h-Eileanan Siar	Harris	£127,794.00	Renovation and refurbishment of two rooms in the old primary school - now utilised as rented workshop space. This will make the building more environmentally efficient, fit-for-purpose for tenants.
4	Tagsa Uibhist (Uist Support)	Uist Social Connectivity through Green Community Transport	Na h-Eileanan Siar	Eriskay, South Uist, Benbecula, Grimsay, North Uist, Berneray	£34,654.00	Purchase of EV to serve 6 islands with community transport. The organisation delivers community transport and community care and this project will allow more people to be supported.

**North Ayrshire**

Agreed commitment – £69,741.00

	Organisation	Project name	LA org based	Islands for delivery	Requested amount	Project description
5	Arran Eco Savvy Community	Eco Savvy Sustainable Food, Travel & Transport	North Ayrshire	Arran	£69,741.00	E bike project across the island to provide healthy, green-travel options, for residents and visitors in conjunction with a community larder project supported by the Co-Op to cut down food waste and tackle food poverty in partnership with the community shop. A new mobile hub and outreach service will also be created.

**Orkney**

Agreed commitment – £90,091.76

	Organisation	Project name	LA org based	Islands for delivery	Requested amount	Project description
6	British Red Cross (BRC)	Orkney and Shetland Community Transport and Support	Orkney and Shetland	Mainland Orkney, South Ronaldsay, Westray, Sanday, Hoy, Burray, Stronsay, Shapinsay, Rousay, Eday, Papa Westray, Flotta, North Ronaldsay, Wyre,	£90,091.76	BRC will purchase and adapt two electric vehicles for their services across Orkney and Shetland, which support around 2000 people a year. The van will be free to use in order to support community resilience, personal wellbeing, COVID response & recovery and disaster relief. This represents BRC's first EVs in the north of Scotland. The vehicles will help to deliver services across the Orkney and Shetland Isles - although in some instances local barriers need to be overcome e.g. direct travel onto some islands is not possible by vehicle.

				Graemsay, Egilsay, Auskerry, Holm of Grimbister, Gairsay, Inner Holm  Mainland Shetland, Whalsay, Yell, West Burra, Unst, Bressay, Trondra, Muckle Roe, East Burra, Fair Isle, Fetlar, Housay, Foula, Bruray, Papa Stour, Vaila		
--	--	--	--	---	--	--

**Shetland**

Agreed commitment - £48,382.91

	Organisation	Project name	LA org based	Islands for delivery	Requested amount	Project description
7	Foula Wool		Shetland	Foula	£48,382.91	This investment represents a second instalment of funding through the ICF, which brings the funding

		The Foula Wool Spinning Mill			(Total commitment through ICF £146,583.62)	<p>commitment to the total value of the original application.</p> <p>The project will install a range of spinning mill machines to allow full processing of fleece into yarn on Foula (fleece is currently processed in England). The project will eliminate shipping overheads and secure two FT jobs – supporting population retention and population growth ambitions. The mill will be operated using electricity from Foula's off grid renewable network, support sustainable local employment and stimulate community-led, inclusive economic growth.</p>
